Webinar

Feline allergy

March 9th 19-21

Together with  we invite you to this webinar

Speaker: Chiara Noli

Time: Tuesday March 9th 19.00-21.00 CET

Link: Click to register [>>>](#)

1. Causes and clinical presentation and diagnosis of feline allergy including choice of the best diet .

The aim of this presentation is to teach about the different allergic causes and show the typical skin lesions that cats develop when they are allergic. Then a systematic approach to pruritus in cats will be explained, for the determination of the final allergic diagnosis, including how to best perform a hypoallergenic diet in the feline species.

2. Treatment of the allergic cat 360°

Once the cause of the pruritus has been identified as an atopic (environmental) allergy this presentation will discuss the many different therapeutical options, spanning from symptomatic to etiologic therapy, topical and systemic, for the best treatment programme, tailored to the individual patient and owner.

Dr. Chiara Noli, DVM, Dip ECVD

Dr. Chiara Noli graduated in veterinary medicine from the University of Milan, Italy, in 1990. After a residency at the University of Utrecht, Holland, she obtained the European Diploma in Veterinary Dermatology in 1996. Since then she works as referral dermatologist and dermatopathologist in Northern Italy.

Dr. Noli was President and Founder Member of the Italian Society of Veterinary Dermatology, President of the European Society of Veterinary Dermatology and Board Member of the International Society of Veterinary Dermatopathology and of the World Association for Veterinary Dermatology; she is currently Vice President of the European College of Veterinary Dermatology and member of the Global Veterinary Dermatology Education Group. Dr. Noli is author of more than 100 articles in Italian and international journals, of nine book chapters and three veterinary dermatology textbooks, and co-editor of the book "Veterinary Allergy" published by Wiley (2014). She has given several hundred lectures in Italy and in other countries of four continents. Her main interests are feline allergy, food hypersensitivity and quality of life assessment in veterinary dermatology.
